Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group II, claims 7-9, in the reply filed on 4/30/07 is acknowledged.

Claims 1-3, 5, and 6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/30/07.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Nagamoto (USPN 5669827).

Regarding claim 7, Nagamoto discloses a golf club head having an outer shell member and a hollow portion surrounded by the outer shell member wherein an inner surface of the hollow portion includes a flat surface and the inner surface has no projecting portion formed thereon (See Figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3711

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nagamoto (USPN 5669827).

Regarding claim 8, Nagamoto discloses a golf club head having an outer shell member and a hollow portion surrounded by the outer shell member wherein an inner surface of the hollow portion includes a flat portion and a projecting portion (See Figure 2). Applicant does not noted the importance of the shape or the radius of the projecting portion to the nature of the invention; therefore, one having ordinary skill in the art would conclude that the shape and radius of the projecting portion are design parameters. The projecting portion of Nagamoto would perform equally as well being that it lowers the weight of the club head.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nagamoto (USPN 5669827) in view of OFFICIAL NOTICE.

Regarding claim 9, Nagamoto discloses a golf club head having an outer shell member and a hollow portion surrounded by the outer shell member wherein an inner surface of the hollow portion includes a flat surface and the inner surface has no projecting portion formed thereon (See Figure 1). Nagamoto does not show a shaft having a grip. OFFICIAL NOTICE is taken that having a shaft with a grip attached to a club head is commonly known in order to facilitate swinging it. One having ordinary skill in the art would have found it obvious to have a shaft with a grip attached to the club head of Nagamoto because it is common known to do such with club heads.
